

The Vision is a compact and easy to drive two stall horsebox; offering a perfect solution to transporting horses without affecting the safety or comfort for both the horse and driver.

Horses load via a side ramp which allows the rider to guide the horse whilst loading. The horses travel rear facing, which studies have proven to be the safest and most comfortable direction of travel for equines. A fully adjustable partition enables each horse to be secured before the ramp is closed.

The Vision has the added benefit of a tack locker and changing area that is completely separate from the horses. This incorporates two saddle racks, two bridle racks and two coat hooks. A bench seat is also available as an optional extra. Additional storage is provided in the pod space over the cab.

- 3.7L V6 275 Horsepower Gas Engine
- New Aerodynamic Design
- Cushion Flooring
- Six Speed Automatic Gearbox
- Grooms Door
